## WORK EXPERIENCE

Jun.2016 ~ NOW DiligentBee technology [Entrepreneurial teams](#)

**Team introduction** DiligentBee technology is an Internet start-up team that covers products, operations, front-end, back-end, mobile and other departments. The team has campus activities, Tutorial and FoodBee, and has participated in competitions and won several national awards. Among them, the number of the public number that the school recruit tutors product operation exceeds 15k users, and PV 1K.

**Front-end major member** Responsible for team project development, maintenance and performance optimization, and participated in the development and implementation of team code specification, and participated in the studio's daily technology sharing communication and codeReview. Accumulated various project development experience and team working experience during the period.

## PERSONAL WORKS

▪ Personal homepage · technical blog · open source works [Link](#)

I like to think about something interesting and use [blog.huangchongqing.com](#) as a personal domain, and use Hexo, GitHub to build a personal technology blog, and some open source projects, plug-ins, etc., have been developed and stored in GitHub.

▪ Mobile terminal cloud music player [Link](#)

Use Vue2 as MVVM framework to develop mobile music player, data interface using QQ music API, use vuex as state layer, using a Axios sustainable, blade extension data layer, business logic and implement componentization. And put this project on my server.

## AWARDS & HONORS

May 2016 "E.A. electronic competition" · The second prize College

Sep. 2016 "Gen youth" competition · the most popular award National

2016/2017 National encouragement scholarship.(two) National

Feb. 2018 MCM/ICM · Meritorious Winner International

## OTHER PROJECTS

Sep. 2017 ~ now [Link](#)

Automatically generate the APP based on NLP's money order.

**NLP** On bank money order fill in the process of complicated issues, in deep learning of natural language processing technology as the core, combined with relevant technology such as Android, develop a good human-computer interaction in order to automatically generate the APP.

## PROJECT EXPERIENCES

Jan. 2017 Tutorial [Team Project](#)

**Technology Development:** Using various technologies such as HTML5, CSS3, Sass, CSSSprites to enrich the display response single page, Handlebars is used as the template engine to process the data logic, and some components are developed based on jQuery.

Aug. 2017 Tutorial h5 [Team Project](#)

**The front-end development:** Use front three frameworks of vue framework, using vuex as state layer, through the vue-router and routing nested routing management, cooperate with the background in data interaction, project development and management.

Sep. 2017 Assistant · Mini Program [Team Project](#)

**Technology Development:** Based on Mini Program MINA framework of the WXML, WXSS, are developed for the code language, and the view layer adopts the Flex elastic layout logic layer to adopt the modular development.

## PROFESSIONAL SKILLS

▪ Master the basic skills of Web front-end development, familiar with W3C standards, page layout architecture, front-end semantics, etc, attach importance to user experience and code maintainability, and have nearly two years of front-end development experience.

▪ Familiar with Handlebar template engine, HTML5, CSS3, responsive layout, responsive layout, and basic mobile phone adapter. And familiar with Vue framework and ES6 related foundation, and have certain project experience.

▪ Familiar with the Git version control and GitHub, Markdown document writing, Coding, code, and with Linux, Sublime, VSCode working as daily development environment, understand the use of project development process and the development and debugging tools.

▪ **【others】** : basic grasp of python language, able to make simple natural language processing of text, understand the Google artificial intelligence system TensorFlow.

## INDIVIDUAL QUALITY

- Be serious about work, responsible, strong sense of team cooperation.
- Like to contact new things, study hard, dare to try, willing to practice.
- Composed, optimistic humor, love calligraphy and basketball.
